This document refers to the Supplier Manual Voith Turbo, also called Supplier Quality Standard, in the Revision 004, 2023-10-01 or later versions. The Supplier Manual is an appendix of the Voith Quality Assurance Agreement Revision 005/11.2023 or a later version. Both documents are available as download on the [Voith Supplier Ecosystem](#).

For orders or contracts with the intention to deliver or contribute to the DAC, the Supplier Manual Division Voith Turbo differs from the basic version as follows:

Variants concerning	Applicable for Digital Automatic Coupling
Quality Management System	The requirement for the rail sector applies
Material Compliance	The requirement for the rail sector applies
All other	The exceptions for Rail do not apply

Table 1: Adaption of the content of the Supplier Manual Voith Turbo

Background: The volume for the Digital Automatic Coupler for Cargo Trains is expected to be significantly higher than common in the rail business of Voith Turbo. The requirements for the Commercial Vehicles business apply. The Table 1 is the result of this adaption.

Individual project specific agreements replace general agreements between companies in case they concern the same.

The additional quality requirements have been checked by the supplier and are confirmed by the specialist department:
