

## Elevate your forming performance PrintForm IT

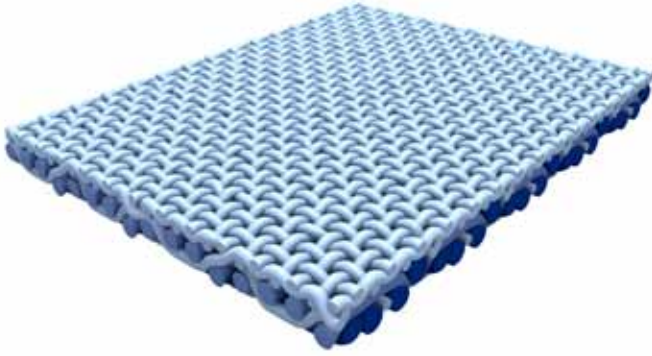

**PrintForm IT is Voith Paper's pioneering development, which utilizes a unique woven construction to generate both an industry fine paper-making surface and thin caliper while still offering excellent stability and wear resistance.**

PrintForm IT therefore offers a wider range of operating benefits than previous generations of SSB (Sheet Support Binder) products, ensuring you an elevated overall performance and optimal cost efficiency.

PrintForm IT incorporates industry fine paper-side yarns diameters and densities to generate superior FSI and Support Point values. The construction includes unique 9:4 and 6:2 yarn ratios, generating industry thin calipers for any given wear yarn diameter. Only Voith offers this unique combination of superior paper-making surface, thinner fabric calipers, and competitive stability and wear potential, making the PrintForm IT the ideal fabric for the most demanding applications.

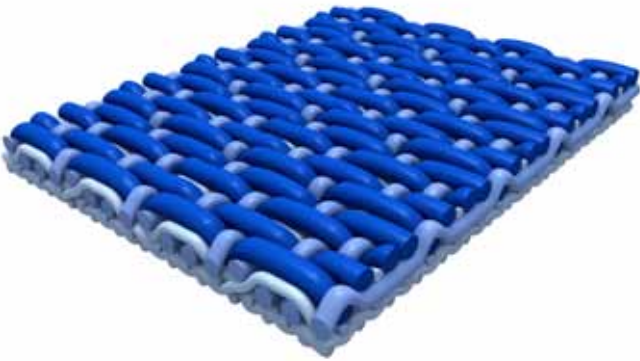

## Super-fine paper side

---

## 4-shed wear side

---

### Paper quality

- Industry high Fiber Support Index and Support Point
- Elevated levels of mechanical retention
- Improved sheet quality, formation, porosity, print mottle
- Improved sheet CD basis weight profiles

### Efficiency

- Elevated drainage rates allow higher headbox flow rates for sheet properties and former efficiencies
- Higher couch solids and savings from reduced retention aid usage
- Reduced fiber carry for a cleaner former operation

### Caliper

- Industry thin calipers with competitive life potential
- Elevated couch solids and cleaner former operation

### Drainage

- Elevated drainage rates allow higher headbox flow rates for sheet properties or former efficiency
- Higher couch solids
