Voith joins sustainability alliance 4evergreen

2021-06-28

- As a member, Voith is committed to strengthening the contribution of fiber-based packaging in a circular and sustainable economy.
- The goal of the alliance is to increase the recycling rate of fiber-based packaging to over 90% by 2030.
- The 4evergreen initiative brings together companies along the entire value chain of flexible packaging solutions.

HEIDENHEIM, Germany. Voith recently joined the 4evergreen alliance, an association of more than 60 companies along the entire value chain of fiber-based packaging with the common goal of increasing the recycling rate of fiber-based packaging to over 90% by 2030. "We are very pleased to be part of the 4evergreen initiative", says Dr. Bernd Gueldenberg, Senior Vice President Research & Development at Voith Paper. "The cross-industry alliance's goal of driving sustainable, recyclable fiber-based packaging solutions fits perfectly with Voith's DNA and our vision to improve our world with highly sustainable and efficient technologies." Various future projects are planned as part of the alliance.

Voith has been strongly committed to the optimized recycling of paper and the development of sustainable products and processes for many years. With innovative technologies, the company plays a leading role in the market. In Heidenheim at the Fiber Technology Center, for example, Voith is conducting research on optimized recycling processes to reduce fiber loss as well as energy and water consumption. The pilot plant consists of all relevant stock preparation machines installed in full scale. A flexible design allows any combination of the individual process stages to work with each other. Supported by state-of-the-art sensor technology, automatic process data acquisition and extensive laboratory analyses, the recycling processes of tomorrow are developed at the Fiber Technology Center. Also within the framework of the 4evergreen initiative, the Fiber Technology Center enables the knowledge gained to be transferred into

practice, thus promoting the joint development of innovative and sustainable strategies.

About the 4evergreen Alliance

The alliance includes paper and board producers, packaging producers and converters, food and beverage producers, food distributors, technology and material suppliers, waste paper sorters and collectors, as well as research institutes and technical universities. In 2019, the European paper industry association Cepi founded the 4evergreen initiative due to increasing consumer demand for fiber-based and sustainable packaging solutions. Together, members are working on innovative concepts to find solutions to global societal challenges, such as climate change and resource scarcity, with the help of fiber-based packaging.

About the Voith Group

The Voith Group is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, oil & gas, paper, raw materials and transport & automotive. Founded in 1867, the company today has more than 20,000 employees, sales of € 4.2 billion and locations in over 60 countries worldwide and is thus one of the larger family-owned companies in Europe.

The Group Division Voith Paper is part of the Voith Group. As the full-line supplier to the paper industry, it provides the largest range of technologies, services and products on the market and offers paper manufacturers holistic solutions from a single source. The company's continuous stream of innovations facilitates resource-conserving production and helps customers minimize their carbon footprint. With its leading automation products and digitalization solutions from the Papermaking 4.0 portfolio, Voith offers its customers state-of-the-art digital technologies to improve plant availability and efficiency for all sections of the production process.
