The Voith group has approx. 19,000 employees globally in over 240 locations with over €4 billion in sales annually.

Find out more

Voith Turbo Industry

Voith Turbo Australia in the Mining Industry is a leading supplier of power transmission and drive system equipment with head office located at Smithfield, NSW. Voith is a specialist OEM with expertise in engineering solutions and the supply of equipment for bulk material handling projects for overland, underground and port conveyors.

Voith Turbo Australia

Voith Turbo Australia is a world leader in conveyor drive technology as well as Linear Booster Drive technology as alternative to tripper drive installations. We are at the forefront of the latest hydrodynamic conveyor design layouts and the drives / controllers required for all conveyor systems at the mine site, washery and the port.

Voith provides integrated soft start fluid couplings and torque limiting coupling solutions for above and underground mining applications to provide highly reliable performance, ensure efficient operation with minimal downtime and maintain an exceptional safety standard.

Our highly specialised engineers and service teams can assist with technical support and analysis for various mining applications, brownfield and greenfield projects. Voith's Australia has extensive experience with on-site installation and commissioning, retrofits, troubleshooting and problem solving.

Voith is also an expert with preventative and predictive maintenance, total cost ownership calculations, training packages and applications analysis to extract the maximum value for our client's investments.

Workshop Capabilities

The NSW head office has a service workshop with overhaul and refurbishment capabilities with 3,711.00²m, gantry cranes and other testing facilities. Other service branches are also located throughout Australia in QLD, VIC, WA and also NZ and utilise equipment such as dynamic balancing machines and partial load test facilities.

Provide Sales, Service and Back-up, incl. 24hr HELPLINE on 1800 086 484, for all Voith Turbo Industry products including:

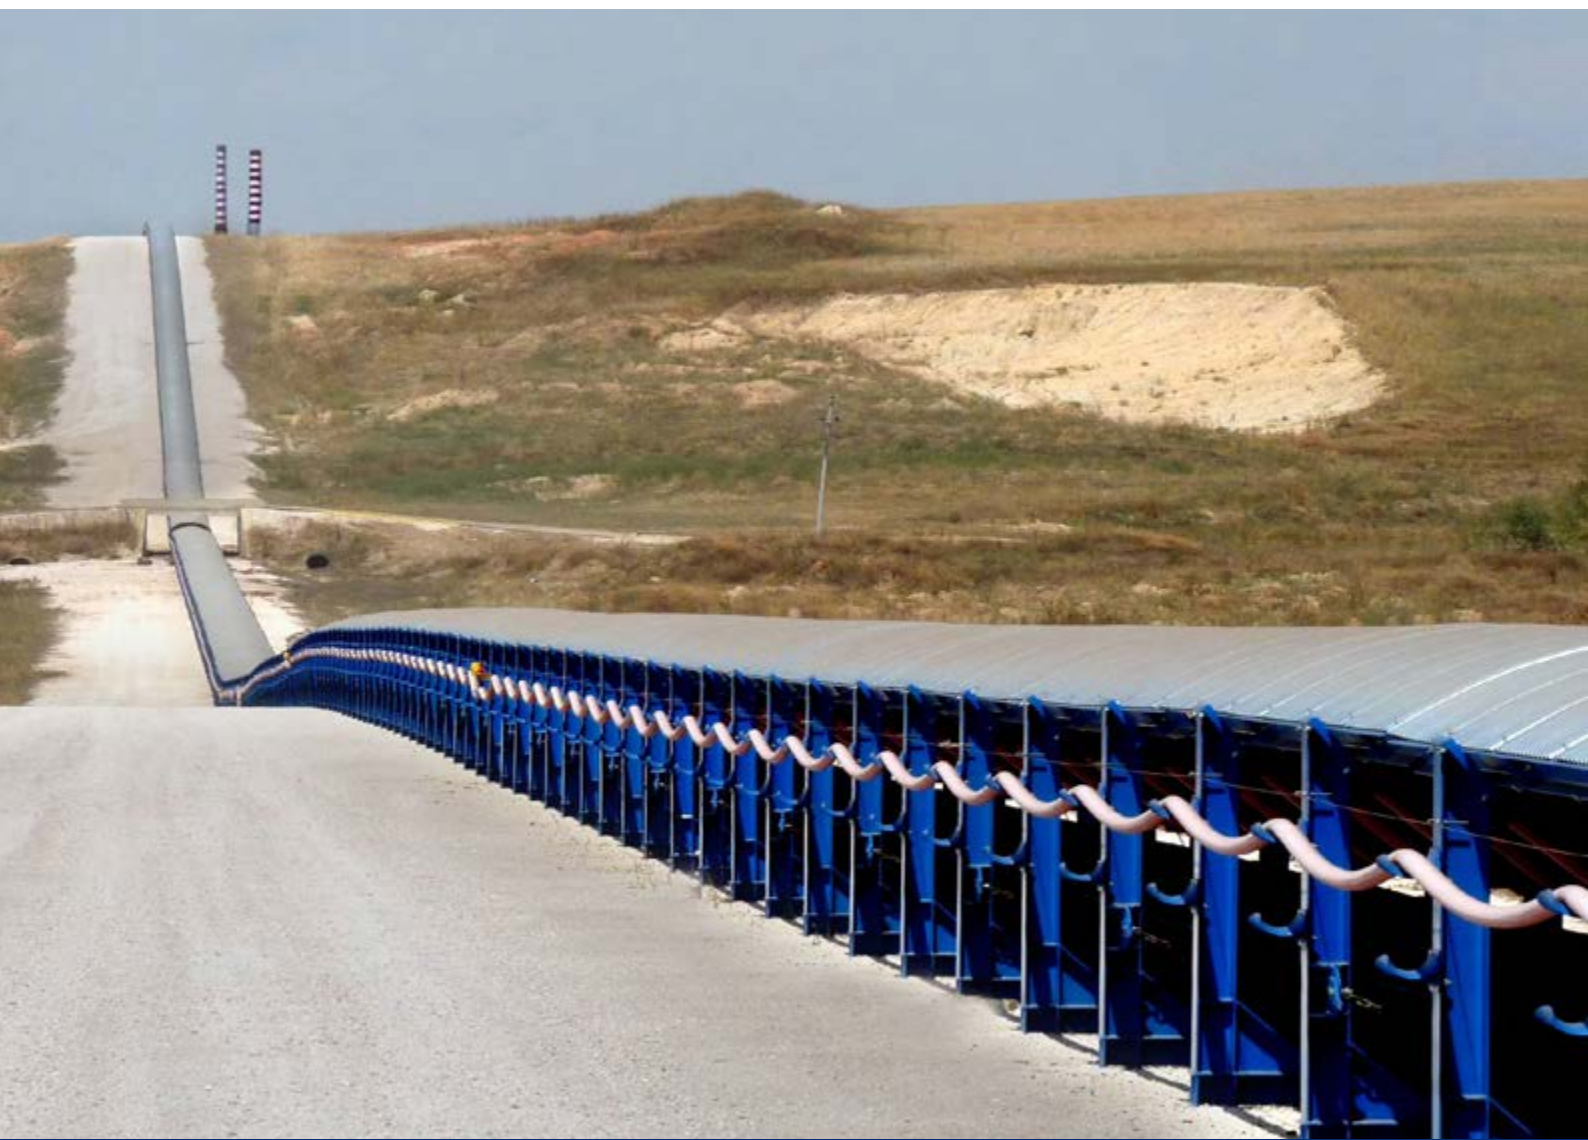

- On site installation and commissioning
- Refurbishment and dynamic test facilities
- In house 12 metre bed Dynamic Balancing machine
- Service / maintenance contractual agreements
- Trouble shooting / problem solving
- Health checks
- Retrofits
- Gearbox overhaul / refurbishment

Field Service

Voith Turbo offers a collaborative field service, working on all Voith Turbo products which include constant fill and fill controlled couplings, industrial gearboxes and cooling systems. Our experienced technicians can expertly diagnose the performance of your equipment and can troubleshoot to find the root cause of any problems and provide a solution.

Our technical experts have the experience and capabilities to analyse behavioural performance of your machines through trend data analysis and we also have the software capabilities to simulate performance and analyse vibrations for all major applications and rotating machinery.

Quality Management

Voith Turbo Australia is quality assurance certified to DIN ISO 9001. Additional services include 24hr helpline for spare parts and technical support, extensive experience with on-site installation and commissioning, retrofits, troubleshooting and problem solving. Spare parts and units stock holdings in Australia greater than \$10 million AUD.
