

Electrifying India

The execution of the 520 MW hydroelectrical power plant Omkareshwar has set unmatched standards in India. Commissioned in a record time of 48 months, the project was awarded the prestigious Gold Shield for early commissioning by the Ministry of Power, Government of India.

Voith combines experience with innovation in delivering hydropower projects in a sustainable way.

With more than 140 years experience in the field of hydropower and high annual spending for R&D, Voith is well equipped to deliver state of the art technology for hydropower projects around the globe.

Recent orders for hydropower projects in India include:

- **Bhasmey** 2 x 27 MW (Customer: Gati Infrastructure Bhasmey Power Pvt. Ltd.)
