### Fast and easy rebuild of existing cleaner systems: New AdaptClean technology ensures optimized cleaning process

2023-05-23

- The new AdaptClean system leads to efficiency increases as well as significant fiber and energy savings for existing low consistency cleaner with a diameter of 105 mm or more
- The rebuild kit consists of an adapter, the tried and tested cones in various material designs, and the Easy EcoMizer
- The modernization is possible for most plants worldwide, regardless of manufacturer

**HEIDENHEIM.** Based on many years of experience in cleaner technology, Voith introduces the AdaptClean rebuild kit, the latest optimization option within its BlueLine product range. The AdaptClean technology enables a quick and easy conversion of existing low consistency cleaners from a diameter of 105 mm. The upgrade involves removing all parts below the headstock. A Voith cleaner cone and the Easy EcoMizer are then attached to the existing headpiece using an adapter. A dilution water line with pump makes the system ready for use again within a few hours.

"With the new AdaptClean system, we now offer an efficient and fast rebuild worldwide and independent of manufacturer for existing cleaner systems," explains Elmar Ott, Product & Service Manager at Voith Paper. "Due to the optimized service lives and higher plant efficiency, customers thus achieve cost savings every day through the modernization, even for originally non-Voith Cleaners. The ROI of the AdaptClean system is therefore less than one year."

To realize the best cost-benefit combination, the new AdaptClean system is available in a wide range of cone materials. The proven Easy EcoMizer enables clog-free operation with optimal fiber backflushing, significantly reducing fiber losses compared to conventional systems. By reducing the amount of fiber, a significant increase in ash content in the rejects can be

realized. In addition, increased inlet stock consistency achieves further energy savings.

Voith also supports its customers with suitable spare parts after the rebuild. In addition to the AdaptClean concept, Voith offers many additional services and individual measures to optimize processes and plant efficiency. Thanks to worldwide service locations and the OnPerformance.Lab remote service center, customers can receive competent support at any time and from any location. Find more information [here](#).

## About the Voith Group

The Voith Group is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, paper, raw materials and transport & automotive. Founded in 1867, the company today has around 20,000 employees, sales of € 4.3 billion and locations in over 60 countries worldwide and is thus one of the larger family-owned companies in Europe.

The Group Division Voith Paper is part of the Voith Group. As the full-line supplier to the paper industry, it provides the largest range of technologies, services and products on the market and offers paper manufacturers holistic solutions from a single source. The company's continuous stream of innovations facilitates resource-conserving production and helps customers minimize their carbon footprint. With its leading automation products and digitalization solutions from the Papermaking 4.0 portfolio, Voith offers its customers state-of-the-art digital technologies to improve plant availability and efficiency for all sections of the production process.

The rebuild kit consists of an adapter, the tried and tested cones in various material designs, and the Easy EcoMizer.
