Focus on energy efficiency: Voith presents digital solution OnView.Energy for the paper industry

2024-01-31

- Voith launches OnView.Energy, an innovative digitalization solution for energy monitoring and part of the Papermaking 4.0 portfolio
- The solution enables paper manufacturers to reduce their ecological footprint
- Clear dashboards, intuitive analysis tools and automatically generated reports identify savings potential and support ISO 50001-compliant reporting

HEIDENHEIM, GERMANY. Voith introduces OnView.Energy, an innovative digitalization solution for energy monitoring that enables paper manufacturers to visualize, monitor and reduce energy consumption to lower their operating costs while minimizing environmental footprint. As part of the full-line supplier's Papermaking 4.0 portfolio, OnView.Energy is based on the IIoT platform dataPARC cloud. With this launch, Voith strengthens its position as the leading supplier of digital solutions in the paper industry.

OnView.Energy offers numerous benefits for paper manufacturers. Dashboards adapted to the needs of the paper industry and intuitive analysis tools increase transparency and identify potential savings. In a clear cockpit, operators receive warnings and alarms in the event of unusually high energy consumption, and countermeasures can optionally be displayed to support the optimum operating mode and thus reduce energy consumption, CO₂ emissions and costs. Automatically generated and distributed reports also support companies with ISO 50001 certification and save time and effort.

"With OnView.Energy, we offer our customers a new solution for optimizing energy consumption in paper production," says Heiko Held, Director

Product Group Digital at Voith Paper. “The customized dashboards and reports, optimized for the requirements of the paper industry, enable operators to identify potential energy savings and make production more efficient and sustainable.”

One reference project for OnView.Energy is Laakirchen PM 10, where the Voith experts have already successfully installed the solution. The intelligent use of existing data is intended to reduce costs and increase added value.

“Our collaboration with Voith enables us to exploit the full potential of digitalization in the paper industry and maintain our competitiveness in an increasingly demanding market,” says Dr. Thomas Welt, CEO of Laakirchen Papier AG. “OnView.Energy provides us with helpful tools to optimize our energy consumption, reduce our CO₂ emissions and achieve our sustainability goals.”

About the Voith Group

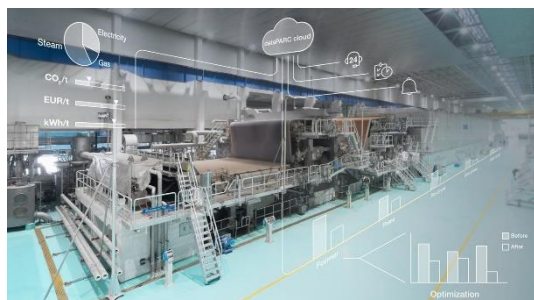

The Voith Group is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, paper, raw materials and transport & automotive. Founded in 1867, the company today has around 22,000 employees, sales of € 5.5 billion and locations in over 60 countries worldwide and is thus one of the larger family-owned companies in Europe.

The Group Division Voith Paper is part of the Voith Group. As the full-line supplier to the paper industry, it provides the largest range of technologies, services and products on the market, and offers paper manufacturers integrated solutions from one source. The company’s continuous stream of innovations facilitates resource-conserving production and helps customers minimize their carbon footprint. With its comprehensive automation products and leading digitalization solutions from the Papermaking 4.0 portfolio, Voith offers its customers state-of-the-art digital technologies to improve plant availability and efficiency for all sections of the production process.
