Adami Group commissions Voith to build a complete OCC BlueLine stock preparation plant with 4.0 technology

2024-07-31

- Adami Group commissions full-line supplier Voith to build a complete OCC BlueLine stock preparation plant with the latest automation solutions
- The scope of supply consists of a Process Line Package, which includes the entire assembly and detailed engineering
- Commissioning is planned for October 2025
- The long-standing partnership between the two companies is based on mutual trust and very good results

SÃO PAULO/HEIDENHEIM. The Adami Group has commissioned full-line supplier Voith to build a complete OCC BlueLine stock preparation plant with 4.0 technology for its factory in Santa Catarina, Brazil. The project includes a comprehensive Process Line Package (PLP), the supply and installation of all main components and detailed engineering. Commissioning is scheduled for October 2025.

"This project not only strengthens the long-standing partnership between Adami and Voith but also demonstrates the shared commitment of both companies to innovation, quality and operational excellence," says Rodrigo Ruffo, Application and Sales Manager at Voith Paper.

With key components such as the new InduraClean heavy-duty cleaning system, the line is specially designed to handle high levels of contamination, a necessary requirement for Adami due to the nature of the raw material. The flexibility of Voith's OCC systems in dealing with varying degrees of contamination was a decisive factor in Adami's choice of Voith.

In addition to the OCC system, the order also includes 4.0 technology solutions for the autonomous operation of the stock preparation system. With the products OnView.MassBalance, OnControl.SmartProtect and the OnView.RejectCamera, the Santa Catarina mill is the first in Latin America to use these cutting-edge technologies. This move reflects Adami's

commitment to remain at the forefront of the industry and to develop innovative processes and technology.

About Adami

The Adami Group, based in Caçador in the state of Santa Catarina, Brazil, was founded in 1942 and operates in the timber sector (splitting and selling raw wood). The family-owned company currently has 2,000 employees and is made up of the Forestry, Timber, Paper, Packaging and Electricity business units. The main products developed for the timber industry are sawn and processed timber, pallets and pellets, panels, frames and doors. In its core business, it produces paper for packaging, corrugated sheets and boxes, supplying various sectors of the economy, particularly the food sector (animal protein). The business units work in an integrated manner with the planting of their own reforested pine forests, located near their manufacturing facilities, as well as integration with their electric power production (SHPPs), aiming to strengthen the ADAMI S/A and VERT brands.

About the Voith Group

The Voith Group is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, paper, raw materials and transport & automotive. Founded in 1867, the company today has around 22,000 employees, sales of € 5.5 billion and locations in over 60 countries worldwide and is thus one of the larger family-owned companies in Europe.

The Group Division Voith Paper is part of the Voith Group. As the full-line supplier to the paper industry, it provides the largest range of technologies, services and products on the market, and offers paper manufacturers integrated solutions from one source. The company's continuous stream of innovations facilitates resource-conserving production and helps customers minimize their carbon footprint. With its comprehensive automation products and leading digitalization solutions from the Papermaking 4.0 portfolio, Voith offers its customers state-of-the-art digital technologies to improve plant availability and efficiency for all sections of the production process.
