

# Optimized machine performance Best-in-class mechanical roll service

## Service portfolio with best-in-class expertise and products

With a worldwide network of 22 Mechanical Roll Service Centers, unrivaled domain expertise and sophisticated digital solutions, Voith provides best-in-class customized roll maintenance to papermakers around the globe.

With individualized service solutions, we ensure maximum machine availability as well as highly reliable and sustainable production lines.

---

## Your benefits

- + A worldwide network of 22 Mechanical Roll Service Centers
  - + Tailored to specific customer requirements
  - + Sophisticated sensor technology and digital upgrades
  - + Increased machine availability and production efficiency
-

“Expertly maintained rolls in paper machines are fundamental to efficient and sustainable papermaking. With the support of our experienced application specialists and state-of-the-art service tools, we are able to recommend if and when optimization or maintenance measures are required. And our global network of dedicated service centers ensures that timely roll maintenance is performed to schedule and to the highest of industry standards.”

Joerg Schaubberger, Global Product Manager MRS & Digital Products at Voith

## Our promise

Precise maintenance and repair –  
a view from all angles

Benefits which pay off

365 – 7 – 24 Service never  
sleeps – worldwide!

Tailor-made solutions –  
for each of your rolls

Reliability and trust! The  
basics for a successful  
collaboration

## Portfolio overview

Voith has decades of experience in roll fabrication and servicing, and a proven corporate quality management system. We implement and guarantee the highest manufacturing standards at every facility. Our knowledge of technological enhancements forms the basis for our activities in production and service worldwide. The high-performance machinery and innovative testing and measuring methods lay the foundations for this success.

### Roll service

Voith services all types of rolls, including those from other suppliers. Periodically, rolls have to be completely reconditioned to the original specification. If needed, we can also perform engineering upgrades. Every solution is tailor made for the specific need, striving for maximum results for the cost.

### Roll upgrades

Roll service is more than just servicing and maintenance. Because good solutions in the past might not be enough in the future, every roll can be adapted to current and future requirements. Voith is continually implementing developments and improvements in materials, mechanical systems, controls and energy consumption. These pragmatic improvements pay for themselves in just a short time.

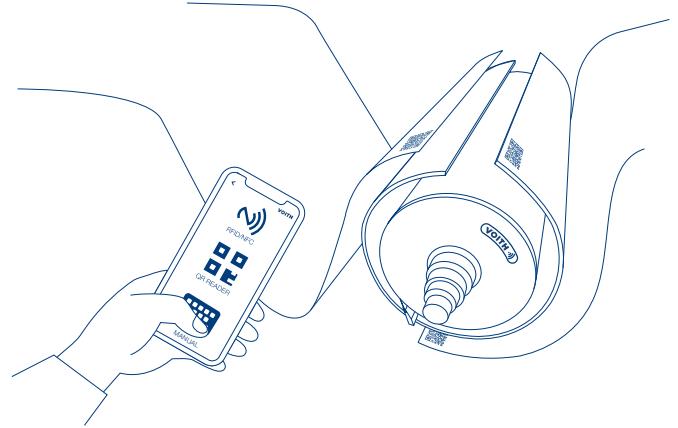

## Digitalization

Voith Paper also provides the roll tracking system OnCare.pmPortal, which is a unique digital asset management tool for your paper machine. With the OnCare.pmPortal, we offer a simple and efficient system to track product-related data of rolls. Anytime and anywhere.
